

Oberon Model 1053-00 Wireless Access Point Enclosure (access point and antennas not included)

Oberon's model 1053-00 wireless access point enclosure is designed specifically for the Cisco 1250 AP. The 1053-00 enclosure permits the AP to be secured in an aesthetic, plenum rated 2' x 2' ceiling tile replacement. Installation and maintenance is simplified and optional antennas mounted to the door provide optimal, unattenuated RF coverage.

Specifications:

- Ceiling tile enclosure specifically designed for Cisco 1250 access point.
- Designed to meet NEC300-22 and 300-23 for plenum installations, OSHPD approved OPA # 1638
- Construction: All Steel
- Accommodates Cisco "AIR-ANT2430V-R" and "AIR-ANT5140V-R" antennas which are attached to the door (standard doors for use with other antennas available upon request)
- Hinged locking door, keyed alike
- Size: 24" x 24", AP Enclosure is 13 " x 13 " x 5 "
- Weight: 16lbs (not including access point or antennas)
