

## Model 1026-00

## Stadium NEMA Enclosure for Wireless APs – Hinged Cover

The Model 1026-00 is a compact NEMA enclosure designed to protect wireless LAN access points from most vendors in challenging indoor/outdoor environments, such as stadiums. This rugged polycarbonate enclosure protects the access point from weather, dust, and impacts, and is transparent to wireless signals, so access points with body integrated antennas or small detachable antennas may be protected. The enclosure has a fully hinged cover, molded in padlock hasps for locking, & interior mounting plate for attaching access points. Enclosures with clear covers are available. Please contact your Oberon representative.

### Specifications:

- Designed to NEMA 3R, 4, 4X, 12, and 13, and IEC529-IP66 specifications for indoor/ outdoor wet, dirty, or corrosive environments. UV stabilized for exposure to direct sunlight.
